

Experienced Equity Options Trader

Cutler Group LP is looking to add experienced option market makers to its partnership.

Cutler provides platforms for individuals or groups of professional traders to act as market makers on listed US Equity options exchanges. Using sophisticated technology, our traders have direct access to options markets and serve as market makers in over 3000 listed issues. Cutler market makers represent a wide range of experience from multiple firms across the street (Wall, LaSalle, Market and Montgomery). As capital partners, your interests and ours are fully aligned. We succeed when you succeed. We offer a superior package of rates for trading, clearing, haircut, technology and revenue split.

Initial capital contribution requirements will be determined based on previous track record and depth of trading experience. All traders and trading groups become members of the Cutler Group LP Broker Dealer and, as such, are subject to the risks of joining the LP and maintaining a subaccount in a non-segregated pooled environment.

If you are interested in becoming a Cutler market maker, please submit your resume and cover letter to careers@cutlergrouplp.com with "Market Maker" in the subject.
